AVANTAJELE ȘI BENEFICIILE UTILIZĂRII TENCUIELII MOZAICPLAST

Tencuială decorativă structurată pe bază de rășini acrilice în dispersie apoasă. Este ideală pentru aplicarea la exterior în spații publice, comerciale, restaurante, hale sau pentru diferite detalii decorative la interior.

Produs cu aplicare, într-un singur strat, în sistem de finisaj profesional.

Se livrează gata colorată pe baza mostrarului ADEPLAST® sau în varianta bicomponentă, soluție Quarzlatex plus granule colorate Quarzcolor 1-1.8mm.

Pentru varianta bicomponentă se amestecă omogen într-o găletă goală, curată 4 pungi Quarzcolor în funcție de codul de culoare selectat, manual sau cu malaxor electric. Se toarnă în Quarzlatex amestecul de granule în fir subțire în timp ce se omogenizează cu malaxor electric la turație redusă din adâncime spre suprafață.

Rezistentă
la intemperii

Rezistență ridicată
a suprafeței

Elastică

Culori rezistente
în timp

CONSUM: 4 - 5kg / m²

Stratul suport

Produsul se aplică pe suprafețe plane, curate și rezistente. Eventualele diferențe de planeitate se rectifică prealabil aplicării grun-
dului. Suprafața nu trebuie să prezinte materiale ce pot forma un strat separator (de exemplu uleiuri sau altele asemenea).

Aplicarea grundului

Se utilizează prealabil ADEPLAST®
Grund pentru tencuieli decorative. Grundul se colorează în nuanță apropiată de cea a tencuielii decorative pentru soclu. Înainte de aplicarea tencuielii decorative pentru soclu, grundul trebuie să fie uniform și complet

Aplicarea tencuielii

Tencuiala se trage cu gletieră de inox pe suportul plan la maxim de două ori mărimea granulației. Suprafața aplicată se lisează pentru obținerea unui strat cu granulația tasată dens, omogen, cu suprafață netedă. Suprafețele de culori diferite se delimitează

Alegerea culorii de bază

Alb	codificată cu "W"
Galben	codificată cu "Y"
Roșu	codificată cu "R"
Albastru	codificată cu "K"
Gri deschis	codificată cu "L"
Verde	codificată cu "Z"
Gri închis	codificată cu "G"
Maro deschis	codificată cu "E"
Maro închis	codificată cu "B"
Negru	codificată cu "S"

SINGLETON:

culoare obținută prin amestecul a 4 pungi de aceeași culoare a granulelor, de forma YYYY, etc.

**SINGLETON MIX:**

culoare obținută prin amestecul a 3 pungi de aceeași culoare și o pungă de altă culoare de forma ZZZW, etc.

**DOUBLETON:**

culoare obținută prin amestecul a două pungi dintr-o culoare și două pungi de altă culoare în proporții egale, de forma KKWW, etc.

**DOUBLETON MIX:**

culoare obținută prin amestecul a două pungi dintr-o culoare și două pungi de culori diferite, de forma RRWY, etc.

**ALL MIX:**

culoare obținută prin amestecul a patru pungi de culori diferite în proporție egală, de forma KLZS, etc.

Dragi clienți,
dorim să vă informăm că
nuanțele de culoare
prezentate în acest catalog
sunt doar cu titlu orientativ și
pot apărea diferențe de
culoare, rezultate după
aplicarea produselor.
Mulțumim pentru înțelegere.
